What will you do?

The Mobile Developer is responsible for the development and maintenance of mobile apps based on product requirements including coding and all levels of testing, maintaining and handling project source code repository, standardizing mobile app implementation (architecture, structure, design, etc) and collaborating with different product teams. This job also includes providing assistance to the technical/product/customer support team, providing project status reports to project managers, participating in project requirements review and managing app deployment/publication in Google Play and/or Apple AppStore.

Product Development

- Build and test mobile applications based on product requirements which require technical knowledge;
- Assist in implementing analyses that will identify requirements to make mobile applications more effective, and its delivery to be more efficient;

Technical Documentation and continuous improvement

- Share knowledge, trends and best practices in mobile application development to colleagues that have an impact to improve business operations

Product Technical Assistance

- Engage in activities that will enable the company's product support group to perform their duties well. Involves the proper turnover of product knowledge and documentation. Assist product/customer support team to troubleshoot raised customer issues whenever necessary;

Technical Documentation

- Create and revise documents that cover the architecture, structure, design, etc. of mobile app products.

Performs other ad hoc activities as necessary and as prescribed by the Immediate Manager or Authorized Representative.

What do we need from you?

- Candidates must possess at least a Bachelor's Degree in Computer Science, Information System, or Information Technology.
- Must have at least 1 years experience as a Mobile Developer
- Required technical skills: ASP.NET WebAPI, Xamarin and C#.
- Deep knowledge in the Apple ecosystem and tools including App Store submission process and developer portal.
- Experience with third-party libraries and APIs
- Exposure to an agile environment is a plus.
- Must have good testing and programming aptitude.
- Must be comfortable with the English language and the ability to communicate well.
- Willing to work following Australian time & holidays.

How to Apply

Bring us your talent, enthusiasm, and help us move to the next level of excellence. If you are someone who enjoys ownership and continuous learning, then we'd love to hear from you! Please submit your updated resume to recruitment@realtair.com with email subject: **Realtair, Inc. – Mobile Dev – First Name and Last Name.**

***Candidates outside Metro Manila or from provinces are welcome to apply!*

COVID-safe precautions

Our recruitment and onboarding process has been adapted to comply with COVID safe precautions using our online recruitment process and Google Meetings online for video interviews.

Everyone's safety is our top priority. If you get the role, you'll be working remotely with the rest of the team until it is deemed safe to go back on normal business operations within the office premises.
